## **Havnegaten in Holmestrand**

The quayside promenade in Holmestrand was given a facelift in the summer of 2012.

Barrikade Steindekke with Norwegian Quarz was selected to protect the concrete surface and make it more attractive.

The total area is approx 1300 m<sup>2</sup> and the system was installed in 4 mm thickness with stone fractions 2,5 - 4,0mm.

- ▲ Requirements:
  - hard wearing
