

System Data Sheet

Barrikade EW

Barrikade®

Epoxy paint for concrete floors

System description

Barrikade EW is a two component water dilutable solvent free pigmented epoxy formulated for treatment of concrete and other cement based material.

Barrikade EW-clear can also be used as a dustbinder on concrete by applying one single layer of coat.

User areas

Warehouses / Terminals
Corridors and technical rooms
Garages
Etc.

Properties

Barrikade EW is primarily intended for surface treatment of concrete and other cement based floors. The surface is easy to keep clean and will have a certain wear resistance. The adhesion to concrete is excellent.

Chemical: Limited chemical resistance.

Mechanical: Due to the modest thickness of the paint system the mechanical resistance is limited.

Thermal: **Barrikade EW** will have limited resistance against high temperature exposure and no resistance against temperature shock.

Build up system

Primer:

1 layer **Barrikade EW-Clear**

Paint:

2 layers **Barrikade EW**

Dustbinder:

1 – 2 layers **Barrikade EW-Clear**
